

Art. 66899

The quantity of grease delivered by the gun must not be measured empirically, but must be measured precisely and displayed directly on the LCD.

Characterized by compact dimensions and limited weight, it can replace normal grease delivery guns with the advantages of:

- guaranteeing correct distribution of grease, thanks to the resettable indicator;
- record grease consumption thanks to indication of the total delivered.

## Technical card Grease gun gram-counter

Article	66899
Inlet connection	1/4" F
Max. working pressure	550 bar
Bursting pressure	1000 bar
Counting precision	+ - 3%
Gram count	4 figures
Totalizator in kg	4 figures
Working temperature	max. 60°C
Battery life	24 months
Weight of gun	1 Kg

(\*) RAASM does not produce this article.

## Gram-counter gun for grease

*Innovatory grease gun, integrated with a gram-counter.*
